

# How to Comply with Used Oil Storage and Hazardous Waste Management

## FREE WORKSHOP

The Northeast Florida Regional Council and Florida Department of Environmental Protection are providing a **FREE** workshop on “how to comply” with hazardous waste regulations and used oil storage requirements.

This workshop will cover topics that apply to most types of businesses that may potentially generate hazardous waste(s). Learn useful information on how to manage your hazardous waste in a cost-effective and legal manner. Common regulated wastes include: used oil and filters, anti-freeze, solvents, rags, paint wastes, lead-acid batteries, dentist amalgams, fluorescent tubes and light bulbs containing mercury.

*For additional information, please contact Eric Anderson at (904) 279-0880 ext. 178 or [eanderson@nefrc.org](mailto:eanderson@nefrc.org).*

### Who Should Attend?

Business Owners or Operators, Facility Managers, and any employee who handles, stores, disposes of, or maintains records for hazardous waste and its management.

Tuesday, Sept. 15th

10:00am – 12:00pm

Nassau County Emergency  
Operations Center (EOC)

77150 Citizen's Circle  
Yulee, FL 32097
